WORK EXPERIENCE

Jobtest (Assessment Platform)

Jul 2022 - Present

JUNIOR FRONTEND ENGINEER

JobTest provides competency assessment solutions for businesses and individuals - helping companies and workers understand their abilities to "optimize" resources and maximize performance.

WEB:
- Create layout looks like a designer's design on Figma.
- Apply REST API to get data and binding data.
- Writing reusable components - system design.
- Build candidate assessment pages with multiple-choice questions, essays, and answers recorded directly through question prompts, etc.
- Analyze the customer specification documents, and create charts to represent the candidate requirements specifications after the assessment.

Admin:
- Calculate and process the parameters for the report, draw charts,...
- CRUD of statistical lists

Jobtest (AIHR Web application)

Jul 2022 - Present

JUNIOR FULLSTACK ENGINEER

The AiHR human resource software is a human resource management platform, typically designed to assist businesses in managing employee information, recruitment processes, training, performance evaluation, and other activities related to human resources. AiHR can provide tools to automate HR management tasks, improve internal communication, and optimize workflows.

Front-end:
- Develop a KPI and productivity assessment system for companies specializing in large-scale assembly line production.
- Upgrade the project from Vue2 to Vue3.
- Apply REST API to get data and binding data.
- Writing reusable components - system design.

Back-end:
- Develop a database for the project based on the structure (Laravel).
- Build APIs related to the WPI productivity assessment system from product allocation and output, and create formulas to calculate work efficiency for applying to salary bonuses P2 and P3.
- Build APIs for third parties to connect.

PIX Interaction

May 2022 - Jun 2022

INTERN FRONT-END

Pix Interaction is a company specializing in IT solutions, focusing on software development and user experience (UX/UI) design. With a team of experienced professionals, the company is committed to delivering high-quality products and services to optimize workflow for its clients.

WEB:
- Create layout looks like a designer's design on Figma.
- Using ReactJS to apply REST API to get data and binding data.
